

Kun Yang

Male, Date of Birth: 06/13/2002

Tel.: 518 244 0623

E-mail: 15755002118@163.com

Address: 40 Malvern Street, Allston, Boston, MA, 02134.

EDUCATIONAL BACKGROUND

Boston University

09/2025-06/2026

- **Major:** Applied Business Analytics
- **Degree:** Master's Degree
- **Main Courses:** Business Analytics and Data Mining, Python & SQL, Quantitative and Qualitative Managerial Decision-Making, Enterprise Risk Analysis, Marketing Analytics, Deep Learning, etc.

Rensselaer Polytechnic Institute

01/2021-12/2024

- **Major:** Mathematics; Minor: Psychology
- **Degree:** Bachelor of Science
- **Main Courses:** AP Calculus, Foundations of Analysis, Multivariable Calculus and Matrix Algebra, Management in the Digital Age, Statistical Methods

INTERSHIP EXPERIENCES

ByteDance(Douyin Business Division)

07/01/2025-08/31/2025

- **Data Cleaning:** Utilizing SQL, over 19,300 pieces of raw data from Douyin's information feed (user profiles, sales figures, traffic channels, product information, etc.) were retrieved from the database. Python was then used for data cleaning (null value imputation, redundancy removal, and similarity matching), yielding over 12,000 valid data entries to support business analysis.
- **Data Analysis:** Excel was used for data slicing and analysis, creating pivot tables and performing feature filtering to select the most influential features on product sales. Different methods and models, such as funnel analysis and linear regression, were used to break down the e-commerce business process from multiple dimensions.
- **Data Visualization:** Key metrics such as sales volume, order amount, and user activity were identified. Visual dashboards were created using Tableau and Excel to display these metrics in charts and tables, ensuring clear communication with partners and supporting real-time updates and interactive visualizations.
- **Data Visualization: Analysis Reports:** Based on analysis and model calculations, provide 6+ updated strategies and optimization suggestions for business development, such as marketing campaign adjustments, inventory management optimization, and product price updates. At the same time, generate 3 corresponding data analysis reports and submit them weekly.

Capgemini

06/28/2024-07/26/2024

- **Data Collection:** Extracted and analyzed user reviews on automotive components (e.g., automatic parking, cruise control) from major car websites to support partner companies in electric vehicle component R&D.
- **Data Processing:** Merged multiple datasets, identified extraction errors, and detected abnormal cases in the data.
- **Model Optimization:** Assisted the IT team in improving model accuracy from 65% to 86% through NLP-based text clustering of similar component names, removal of modifiers, and flowchart design.
- **Business Analysis:** Analyzed the strengths and weaknesses of electric vehicle components based on model results and provided actionable recommendations to partner companies.

Integrated Innovation Center, Institute of Software Chinese Academy of Sciences

06/2023-07/2023

- **Model Research:** Researched machine learning and deep learning algorithms and implementations using PyTorch, and obtained a Coursera certificate in machine learning.
- **Model Construction:** Built a model framework using a simple dataset of bee and ant images, extracted data, and trained the model to identify the species of organisms in the images.
- **Model Application:** Based on the "MAR20: Remote Sensing Image Military Aircraft Target Recognition Dataset," built a neural network to establish and train aircraft recognition and counting models. The accuracy was trained and controlled at 80%, with the loss value less than 1 for most of the training.

Meihui Zhiye LLC

06/2022-08/2022

- **Advertising Analysis:** We discovered that the conversion rate of advertisements on the electronic screens inside buses for new housing developments was close to zero. We analyzed the mismatch between the target audience (students/seniors) and the main home-buying demographic (25-45 year olds with cars).
- **Strategy Development:** We proposed a media transformation strategy, shifting advertising from in-bus electronic screens to full-body advertising on the exterior of buses, thereby increasing visibility to the target audience.
- **Field Research:** We conducted on-site investigations on three high-frequency commuter routes, recording bus operations and audience demographics during the morning rush hour. This verified a doubling of reach among young and middle-aged commuters.
- **Budget Optimization:** We used data to persuade management to shift the 300,000 RMB advertising budget from electronic screens to bus wrap advertising, achieving a cost-effective restructuring by reducing the unit price and doubling the exposure.
- **Results Verification:** Within two weeks of the advertisements going live, sales office visitor numbers increased significantly, and 40% of clients indicated they "learned about the property through bus advertisements." The results were recognized by the company.

RESEARCH EXPERIENCES

- **Business Analytics Research** 01/13/2024-03/31/2024
Gained foundational knowledge in Business Analytics, including Descriptive Statistics, Discrete Probability, Distributions Discrete and Continuous Probability Distributions, Sampling Distributions, Confidence Interval Estimation, Hypothesis Tests about Population Mean and Proportion, Simple and Multiple Linear Regression Models, ABCtronics: Manufacturing, Quality Control and Client Interfaces
Conducted research on ABCtronics, and completed the paper on the Existing Methods and Improvements of Data Visualization
- **AI Research-Guided by Professor David Woodruff** 07/06/2023-08/20/2023
Conducted research on faster computation and proof of Kruskal rank
Collaborated with team members to review existing computational methods and identify their limitations
Improved the algorithm using Machine Learning and Linear Algebra, and developed a verification algorithm, which I subsequently coded and tested
- **Principal Presenter, Foundations of Analysis Presentation** 02/2023-05/2023
Analysis and Proof of Mathematical Problems
Analysis and proof involving infinite limits and the transition to negative infinity
- **Group Leader, Management in Digital Age Presentation** 10/2022-12/2022
Led an in-depth study of the Operational Models of renowned companies like Tesla and Starbucks, analyzing their business strategies and philosophies in the digital era
Conducted research on Walmart's store operations, including location selection, product management, financial performance, social impact
Compiled a financial data change sheet, and delivered three presentations to showcase the group's findings

ADDITIONAL INFORMATION

- **Languages Skills:** TOEFL 97; GRE 335; native Chinese
- **Computer Skills:** PowerPoint, effective communication
- **Interests:** Sports: Fitness, Basketball; Music: Piano, Guitar
